

Tokyo Investment and Business Seminar 2010

○On 28 January 2010(Thursday):Tokyo Investment and Business Seminar 2010(at Hotel Nikko Düsseldorf, Germany)

○On 28/29 January 2010(Thursday/Friday):Individual Business Meetings(at Hotel Nikko Düsseldorf, Germany)

On 28 January 2010, the “Tokyo Investment and Business Seminar” will be held in Düsseldorf, Germany. Our plan is to introduce Tokyo’s superior business environment, high level of technology and productivity with a focus around the environment industry field, to companies interested in setting up business in Tokyo or which have possibilities to enter the Tokyo market.

Presentations by four representatives of small and medium-sized enterprises with high technology located in Tokyo is also scheduled on the day.

For further information, please contact Jetro Düsseldorf’s Ms. Tagawa or Ms. Rehling by email: investjapan@d.jetro.de or tel. 0211-13602-23.

<Outlines about the Attending Japanese Companies>

1 Eugrid Inc.

◇Main product or technology etc.

「Eugrid Secure Client V2.0」

(A safe, secure, comfortable and low-price thin client system, composed entirely of software.)

◇Outline and specialty of the product or technology

A thin client system composed entirely of software has finally been realized. You can use the PC with the mobile option anywhere and it is effective against pandemic situations too. Even in cases where Windows XP, Windows Vista and Windows 7 are mixed, you can use users’ proper desktop and data in these OS, so you don’t have to change over.

In cases where you are upgrading to a new OS, you don’t need to move the data, so it is a low price option and the danger of losing the data is very minimal.

2 First Electronics Development Co., Ltd.

◇Main product or technology etc.

Various products and technologies which are developed by wireless, micro and electron applied technology

(We develop various devices and products which come up exactly to the demand: "Is it possible to make such a thing?")

◇Outline and specialty of the product or technology

It is possible to develop, experiment, design and product devices and products which cater to a wide customer base, from domestic articles to space exploration technology. We can cooperate in design changes to conform foreign products to Japanese laws and regulations. For example: TAG Heuer timing devices (timing device for sports contests), satellites and space communication devices (adopted by JAXA), fire door safety alarm systems, caring diapers that remind you of changing, bone transmission speaker etc..

3 Nano Corporation

◇Main product or technology etc.

「Nanowave MTS6S」

(Super miniature precision machining center)

◇Outline and specialty of the product or technology

Micro machine tools enable the minimum fine process (30 μm in diameter, 200 μm tall in prop process/less than 0.1mm. in diameter of small path hole process). Automatic Tool Changer (ATC) with tool magazines and robot hands is regularly included. With super downsizing (W1000×D600×H1,510mm., 270kg.) and adopting a solar energy drive, the production process was economized and low carbon emissions have been realized.

4 RHESCA CO., LTD.

◇Main product or technology etc.

「SAT-5100」(solder checker)、 「PTR-1101」(bonding tester)、 「CSR-2000」(thin film scratch tester)

◇Outline and specialty of the product or technology

A top maker in Japan of the above three products. 「SAT-5100」 realized a sensitive solder wettability evaluation for micro-soldering materials with easy operation. 「PTR-1101」 enabled a wire bonding test for strengthening electronic parts for everything from IC to print boards with a single product.

「CSR-2000」 is a revolutionary tester which can evaluate adhesion to the interface of thin film (few 10 \AA ~ few μm thick) and matrices in fixed quantity.
